**Mark Judson For Congress - Scor...****@Judson4Congress**

Proud Boys - My Guess:

Your names are on lists at EVERY 3 letter agency.

Encrypted chat rooms aren't encrypted - not to the NSA.

After Trump* is out - you're fresh out of friends in the Government.

Spring is coming - and with it, no knock warrants.

Shoot twice and go home.

Good thing STANAG mags hold 20+ rounds. We wouldn't even need to reload.

7  FREEDOM

Chinese friend says the china chinese wouldn't know what to do with Liberty. It has been beaten out of them. But they look through the glass at us like little urchins salivating at the door to an ice cream parlor. Deep down every human wants freedom. (That's why I'm beginning to believe the DS fucks really aren't human. Maybe some of our posters here are right. Maybe those "people" are reptiles or aliens. they certainly don't act human.)

It's not just a threat now. Traitorous and murderous Demonrats have not only declared war, they have brought it against American patriots with multiple assassinations (justice Scalia, 3 lawyers investigating DNC's Deborah Wasserman Schultz, Crooked Hillary's body trail, Seth Rich, etc.) and mass murders (victims Steve Scalise, Family Research Council, etc.) Recently, AOC has also openly published hit list of Conservatives, including judges, across USA. Mark enlisted in the Army at the age of 17, and attained the rank of Staff Sergeant before attending the grueling Officer Candidate School (OCS) program. Mark served as the Class President for his OCS class and was a Distinguished Military Graduate of the course. In 2004 Mark deployed to Iraq for a year in support of Operation Iraqi Freedom (OIF) and retired in 2006 with the rank of Captain. The highlight of Mark's military career was serving as the Unit Commander for a battery of self-propelled 155MM Howitzers.

4 I saw this guys tweet, it's fucking insane and wrong. Encrypted chatrooms are so, the NSA can't do anything. It's why they made Dual_EC_DRBG, which was an encryption algorithm they passed off as the product of a shell company and put in a backdoor. It was one of four approved Cytologically Secure (P)RNG algorithms, meaning it was used for passwords and similar stuff. It wasn't found out until 2014 that they had a backdoor for it via the Snowden leaks...
